Coventry City College

October 2010 -- April 2013,

Coventry

Book-keeping & Accounts Level 1

Warwickshire College

2009, Warwick

Motor Vehicle Technician

Vocational Secondary School

1993 -- 1997, Wodzislaw Slaski,

Poland

Krzysztof Pajak

SENIOR SOFTWARE DEVELOPER

Experienced software developer with over ten years in the industry, constantly seeking innovative solutions to everyday problems. Strong analytical thinking and collaboration skills with a passion for problem-solving. Firm believer in core design principles that make software readable, maintainable, and testable.

EXPERIENCE

Senior C# Full Stack Software Developer

October 2021 -- Present

Relex Solutions · Stoke-on-Trent (Remote)

Working on large-scale projects used by companies such as M&S, WHSmith, and Lidl for store floor planning.

- Improved existing API project by decoupling tightly coupled code into testable, exchangeable services
- Created comprehensive unit tests to ensure high code coverage
- Designed and developed new endpoints and underlying services
- Built micro-frontend services in TypeScript and React to replace on-premise desktop solutions

Senior Software Developer

January 2021 -- October 2021

Redfish Systems · Kettering (Part Remote)

Led a project built using Onion Architecture (Clean Architecture) in C# .NET Core.

- Architected a system responsible for customer gain and loss operations for energy suppliers
- Built an interchange between CRM systems and external API (DCC) with status tracking
- Implemented loosely coupled layers with Dependency Injection using xUnit for unit and integration testing
- Used Dapper as a mini-ORM and RoundhouseE for automated database deployment
- Maintained all database deployment scripts within the solution following SQL best practices

Software Developer

April 2019 -- November 2020

Nimbus Property · Warwick

Maintained front-end and back-end of the highly successful Nimbus Maps web application built with C# .NET 4.6.

- Implemented new UI designs and features using HTML, CSS, jQuery, JavaScript, and Bootstrap
- Introduced SCSS and object orientation to the front-end codebase
- Improved application load time performance
- Migrated map layers from Fusion Tables to WMS tiling system, simplifying the process of managing layers independently of app releases
- Implemented module pattern to existing JavaScript
- Established foundations for database continuous delivery using RoundhouseE

Systems Developer

May 2018 -- April 2019

Oxygen Finance Ltd · Birmingham

Responsible for back-end solutions for large-scale financial systems used in the public sector.

- Developed solutions built on .NET Core 2.1, Entity Framework, RabbitMQ, and Unity Dependency Injection
- Created and maintained highly efficient data pipelines
- Developed unit and integration tests using MS Unit Testing
- Used RoundhouseE for database deployments

Database Developer

February 2016 -- May 2018

FPS Distribution Ltd · Stratford-upon-Avon

- Designed and developed MS Access projects with Azure SQL back-end for business monitoring and reporting
- Re-engineered existing Access projects into Access front-end & Azure SQL back-end solutions
- Improved UI/UX across current and new Access projects

Finance Assistant

December 2013 -- February 2016

NHS Arden CSU · Warwick

- Designed and developed Access projects to improve financial team performance
- Replaced existing Excel-based solutions with more efficient tooling

BI Data Technician

June 2013 -- September 2013
